## OBJECTIVE

---

Mechanical Engineering student seeking an internship to gain practical experience in design, manufacturing, and thermal–fluid analysis. Proficient in CAD modelling, simulation, prototyping, and engineering documentation.

## EDUCATION

---

**National Institute of Technology, Jalandhar**  
Bachelor of Technology in Mechanical Engineering

2023 – 2027  
CGPA: 7.37/10

## SKILLS

---

**CAD** — SolidWorks, AutoCAD, Fusion 360, GD&T  
**Simulation** — ANSYS (Thermal/Fluid/Structural), Abaqus  
**Manufacturing** — Turning, milling, 3D printing, material selection  
**Mechatronics** — Arduino, ESP32, sensors, actuators  
**Tools** — MS Office, Canva

## RELEVANT COURSES

---

**Mechatronics** — Sensors, actuators, microcontroller basics  
**Machine Design** — Failure theories, fits & tolerances  
**Fluid Mechanics** — Flow analysis, pipe flow  
**Heat Transfer** — Conduction, convection, radiation

## PROJECTS

---

**Pipe Vice Design**  
*Academic Project*

2025  
*NIT Jalandhar*

- Designed and assembled components (Fixed Jaw, Movable Jaw, Spindle) in SolidWorks.
- Performed basic manufacturability study and material selection.

**IoT Temperature Monitoring & Automation System**  
*Personal Project*

2025  
*Self*

- Built an ESP32-based device with sensors and relay for temperature regulation.
- Implemented real-time monitoring via Wi-Fi dashboard accessible on web.
- Added remote relay switching for safety and automation.

## ACHIEVEMENTS

---

**Hackflash : NIT Jalandhar (2025):** 1st place , built a working prototype under tight time constraints.  
**36-Hour Hackathon : NIT Jalandhar (2025):** Team-developed end-to-end technical solution.

## ROLES & RESPONSIBILITIES

---

**Core Member — Deja Vu Club**  
*Videography & Film Club*

2024 – Present  
*NIT Jalandhar*

- Managed video production, editing, and camera operations for major campus events.
- Contributed to short films, promotional content, and event coverage.
